Vending Solutions for PPE & MRO Supplies

See a 30% Reduction in Costs
Control Safety – MRO – Office Supplies
Works with Employee ID, Bar Code/Mag Stripe – RFID Cards

The Safety Source, LLC is a WBENC Certified Woman Owned Business

Control Management

The MRO / Safety Vending Solutions Dispenser provided by The Safety Source is our automated dispensing and inventory control system based on age-old proven vending machine technology, combined with the enormous power of our customizable software we can provide flexible solutions to any business. Facebook, Google, HP, Norfolk Southern, Magna are just a few of the companies using this technology to control and track MRO, PPE & Office Supply usage.

More Accountability Means Less Waste

The dispenser solution reduces the usage of daily consumables and overall costs through employee accountability, accurate inventory management and improved employee efficiency. Employees can now step up to the dispenser right on your shop floor, choose only the items they need and go right back to work without a supervisor or inventory manager having to stop their productive work to dispense supplies & equipment.

- **Reduce Product Shrinkage:** The software tracks each employee usage and can limit their access to supplies based on their job, department or the time of day. You can limit an employee to what they should use in any given period.
- **Increase Employee Efficiency:** The dispensers have the durability and capability to hold a large stock of items. The machine can be located right on your shop floor. Employees have a quick and easy access to all the supplies they need without having to walk over to a parts storage area or get a supervisor to get the items.
- **Reports- Reports- Reports:** Almost anything you need to know can be viewed in the available reports. Hundreds of report variations can give you information on specific product usage, type of product, by employee, by machine for any date period, etc. Email or text alerts can be sent to key personnel to notify if an item is running low or out of stock.
- **Reduce Supervisor/Safety Manager's allocation time:** Ask yourself how many man hours your supervisors and/or safety department personnel spend handing out and procuring supplies. You will see an immediate reduction in their time performing these duties thus making them much more productive to your bottom line.

Vending Equipment Features

Safety, MRO, Office Supplies Controlled Access Dispenser

- 5 - 7 Shelves offering 6 - 12 facings per shelf with 5-20 items per selection.
- 30- 60 product facings overall
