First Aid Solutions. Custom. Quality. Fast.

Solid H Instant Electrolytes

First Aid Cabinet Ready

SOLID.H® Instant Electrolytes Electrolytes help you maintain the right balance of fluid, improving performance and staving off muscle cramps without chugging sports drinks or the annoyance of messy powder mixes.

Benefits of SOLID.H®

Nutrient Density Technology (NDT)® sends electrolytes through the lining of your mouth, directly to your bloodstream in as little as 1/10th of the time of powder mixes or sports drinks.

Item #7687 SOLID.H® Instant Electrolytes
Lemon Lime • 4 per sachet • 6 sachets per box

Item #7833 SOLID.H® Instant Electrolytes
Grape • 4 per sachet • 6 sachets per box

There's no more need for messy powders, inconvenient drinks, useless pills, and unneeded bathroom breaks. SOLID.H® is the only hands-free, zero prep, instantly absorbed option in hydration and heat stress prevention. SOLID.H® checks every convenience box — and then some!

Does the delicious taste really make SOLID.H® more effective?

SOLID.H®'s delicious flavors are designed to pack a punch and get those salivary glands working overtime. The more our salivary, sublingual, and submucosal glands are activated, the more absorption is able to take place within the mouth. So go ahead, reward your hard-working spit with some more Solid. It's like a flavor explosion that even your saliva glands can't resist! Who knew spit could work as hard as you do.

What are the best ways to consume SOLID.H® electrolytes?

The superior science of SOLID.H® makes it possible to vary your experience. Some people just follow what the packaging says, letting a single round absorb 5-10 minutes. Others prefer to absorb SOLID.H® longer, maximizing effects, benefits, and enjoyment. Go ahead, customize your SOLID.H® experience and make every moment a mouthwatering masterpiece!
